I found an annual data for Montana at EIA, so I will use that and cite it. Thanks for the help. The annual revenue for Montana from electricity sales in 2010 is more like \$930 million rather than \$90 million. Thanks again.

Jeff

Hi Jeff,

I had the same question. If you scroll up to the top of the webpage, it says they are "electric power monthly". I just took the Oct 2010 and/or Oct 2011 and multiplied them by 12. I know there are fluctuations in the year but felt it was still a good resource for an estimate.

I hope that helps.
Thank you,
Karen

Tina:

Per the data you sent me on Electricity sales, I assume that these are annual numbers? The heading says Oct 2010 and Oct 2011 so I want to make sure that there are not monthly numbers only.

Jeff

Jeff,

here is a source of info that you'll want to take a look at for our discussion this week.

Manjali,

Please see the source for electrical generation revenue:
<http://www.eia.gov/electricity/monthly/index.cfm> I choose to use Table
5.5A which I attach below. If you look up Montana's monthly "Revenue
from Retail Sales of Electricity to Ultimate Customers by End-Use
Sector", it can be used to fill in the "total annual sector revenues" in
Figure 2.

Note this is monthly not annual, something I just noticed back at my
desk, so it's not as clean as I mentioned in passing with you at 3:30.

We can discuss at our meeting tomorrow.
Thanks!
Karen
